

Project Concept Sheet

Project Title:

- Furniture Store Website

Project Overview:

- The project aims to create a website that serves as an online store for furniture items such as chairs, tables, sofas, beds, and cabinets. The website will have a user-friendly interface that will allow users to browse and purchase items easily. The website will also include a content management system (CMS) to manage product inventory, order fulfillment, and customer data.

Project Features:

- User registration and login system
- Search and filtering functionality
- Product categories and tags
- Shopping cart and checkout system
- Payment gateway integration
- User review and rating system
- Order tracking system
- CMS for managing product inventory, order fulfilment, and customer data
- Responsive design for mobile and desktop users

Target Audience:

The target audience for this website is people looking for stylish and affordable furniture items to decorate their homes or offices.

Technologies Used:

The project will be developed using HTML, CSS or any related framework.

Project Goals:

To develop a fully functional and visually appealing website for a furniture store

To provide a smooth user experience for browsing and purchasing products

To implement security features to protect user data and payment information

To showcase the skills and knowledge of web development students.
